

EDEM CLINIC

UKRAINE

«DETOX NEW» PROGRAM 7 days

A proprietary detoxification program created over many years of experience aims to normalize weight, strengthen the work of exo- and endotoxin and free radicals removal systems, and reduce the body's oxidative stress. Our specifically targeted methods employ science-based principles with a personalized approach and the most up-to-date knowledge on preventing aging processes. They focus on cell restoration, metabolism stabilization and acceleration, improving the body's vitality. The program combines molecular hydrogen, baro-, hydro-, phyto-, peloid factors, and drainage techniques.

A nutritionist supervises your personal nutrition program. Based on your clinical data, the nutritionist will choose the detox diet to achieve the best results and improve your vitamins and trace nutrients absorption. You will receive recommendations on how to adapt your dietary style after the program. In accordance with the results of your tests, the team of supervising physicians will provide recommendations on identified deficiency conditions, stimulating enhanced detoxification systems, and improving your lifestyle.
