DIAGNOSIS AND CORRECTION OF METABOLIC DISORDERS IN CHILDREN (Future Health Programming) 21 days

The purpose of the program: to minimize the effect of risk factors, improve the child's metabolism, prevent the risk of complications in the future. The program provides:

- an in-depth nutraceutical audit with determination of the peculiarities of eating behavior, nutritional support before, during and after the completion of the program.
- determining the characteristics of the child's health on the basis of biochemical, genetic and instrumental examination methods.
- development of a plan for the correction of detected violations of metabolism, social and food behavior, and physical activity.
- implementation of a comprehensive approach to weight control in children, taking into account age, severity of obesity and the presence of obesity-related diseases.
- combined interventions consisting of diet modification, physical activity, behavioral therapy, and healthy lifestyle education that will be effective in improving metabolic and anthropometric indicators.

GOALS of the program:

- Assessment of individual characteristics of health, nutrition, hereditary and metabolic risks.
- Assessment of the child's social and physical activity, behavioral reactions in the dynamics of observation.
- Study and evaluation of the peculiarities of the child's metabolism, the presence of deficiency states and correction of the identified disorders.
- Identifying the main risk factors for diseases associated with excess body weight or obesity and associated metabolic disorders and providing recommendations for their prevention.
- Creation of an individual dietary menu (for 21 days).
- Selection of physiotherapeutic and fitness methods.
- Individual selection of necessary vitamins, trace elements, nutraceuticals.
- Personalized recommendations regarding lifestyle, nutrition, and physical activity.
- Personalized support of the child regarding excess weight.
- Optimizing the child's metabolism, hormonal balance, gradual weight loss
- Improving the well-being and self-esteem of the child, achieving harmony in social relations.
