COMPLEX DIAGNOSTICS OF METABOLISM IN CHILDREN *3 days*

A combination of the unique experience of pediatricians and nutritionists, fast and highly accurate instrumental and laboratory diagnostics. Within 3 days, an analysis of the child's state of health will be carried out and the peculiarities of metabolism and the causes of excess weight will be determined. The program consists of a comprehensive assessment of the state of health, eating behavior, laboratory screening of metabolic factors, analysis of body composition (56 parameters), complex diagnostics for the content of minerals, vitamins and heavy metals in combination with SPA relaxation.

GOALS of the program:

- Assessment of specific health, nutrition, and metabolic risks.
- Study and assessment of the characteristics of the child's metabolism.
- Identification of the main risk factors for the child's metabolic disorders with the aim of their correction.

The program is intended for boys and girls from the age of 11 and their parents who are concerned about the health of their children.
